

FORMAT MIDTERM 1

CTRW Mid-Term Exam **1**

To be held online in week 6

This exercise contains 20 questions.

SECTION 1 GENERAL CONCEPTS (10 True/False questions, 1 mark each)

These are all True/False questions on basic concepts.

Sample question:

Consider the following argument:

Vegetables are good for you and we should eat what is good for us and not drink or smoke too much. So we should eat vegetables.

The following statement attacks a premise of the argument:

Smoking and drinking provide mental benefits that vegetables cannot provide.

- A. True
- B. False**

SECTION 2 DEFINITIONS (5 MCQs, 2 marks each)

These are multiple-choice questions about definitions.

Sample question:

Consider the following definition of insect:

An insect is a small animal that has six legs and wings

Which of the following is false?

- | | | |
|----------|---|----------|
| A | This definition is not ambiguous | F |
| B | This definition is vague but can be made more precise | T |
| C | This definition is too narrow. | T |
| D | This definition is not unfairly emotive | T |
| E | This definition is not circular | T |

A: 'has six legs and six wings' or 'has wings and has six legs'?

B: 'small' is vague but could be specified as 'weighs less than 2 grams'.

C: Not all insects have wings, for example fleas.

SECTION 3 DIAGRAMMING (5 MCQs, 2 marks each)

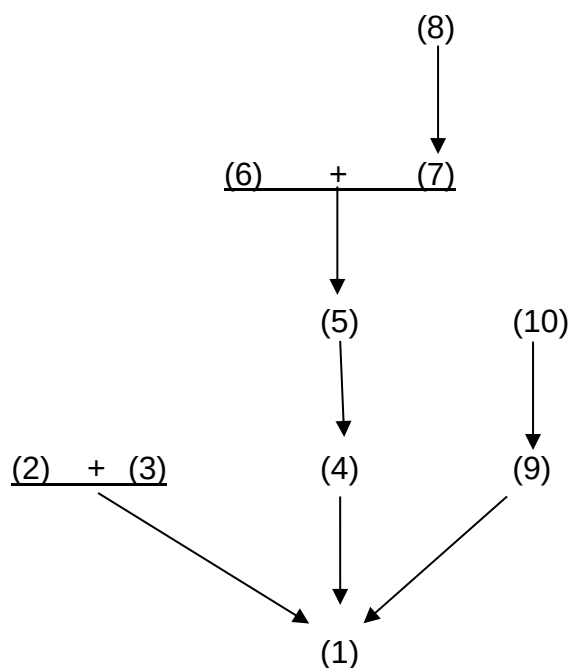

These are multiple-choice questions on diagramming reasons.

Sample question:

Using the given numbers, diagram the following passage using only solid arrows and then answer the questions that follow.

It is morally wrong to abolish the insanity defence against criminal responsibility, as some nations have done recently. It is wrong because (2) people who are insane cannot be held responsible for their actions and (3) it is wrong to punish someone who is not morally responsible for a criminal act. Besides that, (4) it is absolutely useless to punish those who are insane since (5) their punishment would have no deterrent effect whatsoever. (6) Those who are sane would not be deterred by it, and (7) neither would those who are insane be deterred by it, since (8) they don't understand what's going on anyway. And last but not least, (9) abolishing the insanity defence would lead to increased overcrowded prisons since (10) those who would otherwise be put in a mental hospital will now be put in the normal prisons.

Correct diagram:

How many basic premises (reasons unsupported by any other statement) are there in the diagram?

- A 2
- B 3
- C 4
- D 5**
- E 6
